

## Solution brief

Solutions: Major projects, PPPs

Product: AManagement

# AManagement

Intelligent management for major projects

## Will you use your major project documentation to proactively manage risk or will it just gather dust?

Affinixtext links approved processes, notice templates and scheduled tasks to any specific clause to push information to people when they need it. Assign and schedule tasks against any clause to ensure compliance and timely performance.

## Revolutionize the way you manage major projects

Move beyond best practice access to source documents to also transform them into powerful management tools. Affinixtext integrates process and knowledge management into an online interactive project library to embed approved processes at the relevant clause and proactively manage risks, rights and obligations over the life of a major project:

- Link approved processes, notice templates and scheduled tasks to the exact clause in underlying documentation
- Assign and schedule tasks to push information to project stakeholders when they need it — next week or next decade
- If an issue arises, simply click through from the relevant clause to the approved process and templates
- Immediately issue a notice to relevant parties or initiate approved internal processes.

With Affinixtext AManagement you can do all of this and more.

### Affinixtext modules

AProcurement, AKnowledge, AManagement

## \$1 billion p.a. contracts for rail-based public transport

“I wanted more than a repository; I wanted a tool that we could use to drive fundamental change. It was obvious that only Affinixtext could do what we needed. The efficiencies that Affinixtext enables will deliver the Division a 15% productivity improvement.”

Norman Gray, Deputy Director of Public Transport/Franchise Relationships, Department of Transport, Victoria.

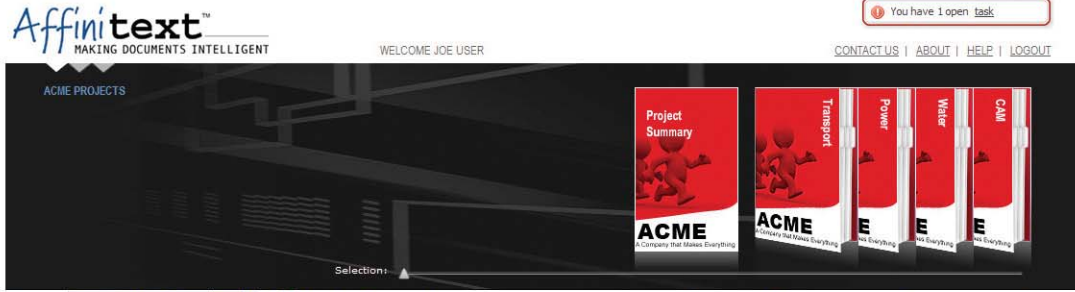

## \$1.6 billion p.a. market

“Affinixtext management module is reducing our risk profile. Setting tasks and alerts enables us to manage processes more efficiently now and into the future.

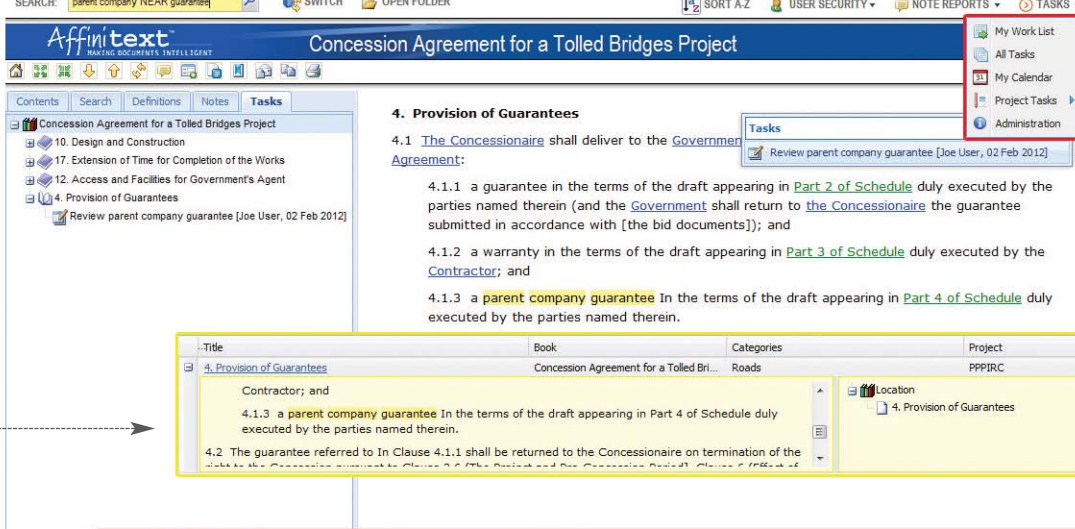

There is a huge benefit in being able to work with our legal team in advance to draft and approve standard notices and letters and integrate them in the project library for easy access over the life of the project.”

Graeme Kaye, Project Director, Major Projects Victoria.

# Don't just document processes... manage them !

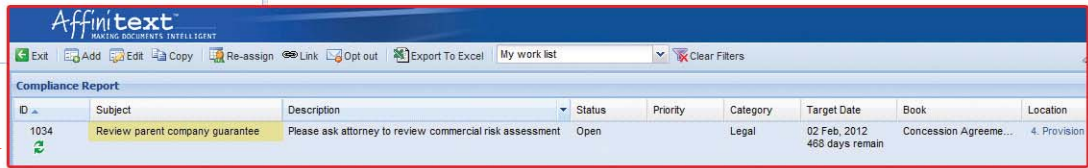

Access project information anywhere with a powerful online interactive project library

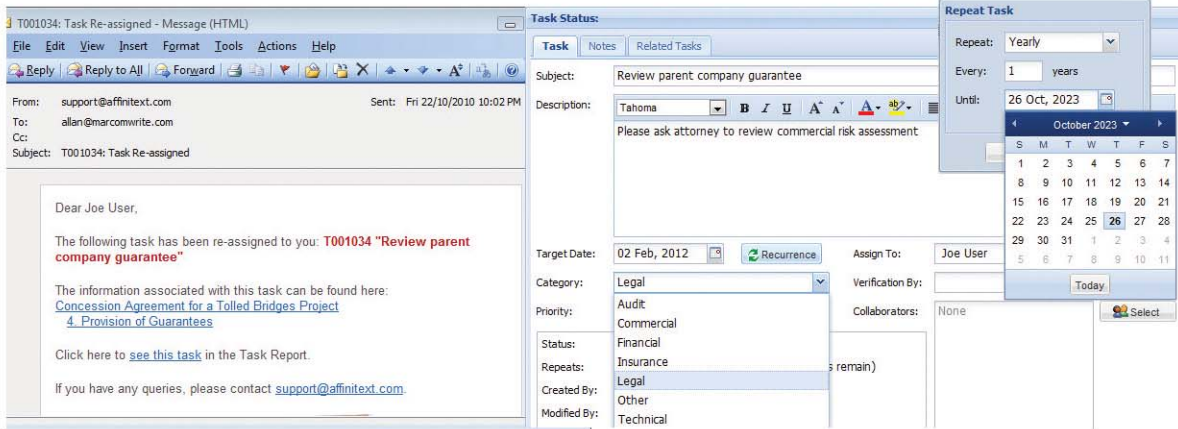

Find answers fast with powerful Boolean search capabilities. Example: Where does 'parent company' appear near the word 'guarantee'?

Manage the full life of your major project with tasks on an individual clause scheduled for next week or next decade

Specify, schedule and assign tasks linked to the relevant clause in the source document
